

K-Love, 94.9FM in Memphis, is a very important station to my community. The station provides alternative broadcasting for me and my family. The station provides positive messages and positive music. The station provides me with the opportunity to listen to the radio without worrying that offensive language or lyrics will be heard by others in my care.

K-Love is listener supported. It is obvious that the community desires the station or they would not financially support it. If the community is paying for the station to be on the air, then there must be a benefit to the community. People do not support what they do not believe in and benefit from. Making policies that eliminate the communities right to choose what is available on the radio would be a mistake.
